Course synopsis (max. 10 lines)

With continuing developments in instrumentation and equipment come parallel refinements in phaco techniques. This course covers a spectrum of safe and effective current surgical techniques and is supported by high quality video.

Topics include a few important basics such as incision construction but concentrate more on advanced techniques of nuclear fragmentation including horizontal and vertical chopping as well as biaxial microincision phaco.

Aim(s) of the course (max. 10 lines)

Also covered is the management of challenging cases such as small pupil, rhexis tear-out rescue, zonular dehiscence and CTR's.

The preparation and use of Triamcinolone is covered in detail but the topics of vitreous loss and anterior vitrectomy are included in a separate pre-requisite course

Achievements (what will the participant achieve in knowledge) _____

Course outline (please specify or add a flyer) _____
