Course synopsis (max. 10 lines)

This course will demonstrate the benefit of collecting data on outcomes. The philosophy behind is that by knowing my results and by comparing my own results over time and anonymously with others I will identify what's good and what needs to be better. This knowledge will initiate a clinical improvement work to the benefit of my patients.

The course will demonstrate the possibility to improve my clinical work by use of the EUREQUO system.

Aim(s) of the course (max. 10 lines)

Aims:

To show the benefit of collecting outcomes data, to outline the important outcome variables in cataract and refractive surgery, to introduce tools for clinical improvement work, to show the EUREQUO system and the benefit of being a participating surgeon.

Achievements (what will the participant achieve in knowledge)

Knowledge of the important outcome variables in cataract and refractive surgery.

How to use outcomes data in clinical improvement work.

How the EUREQUO system works.
