Course synopsis (max. 10 lines) _____

The Course will be mostly directed to surgical technique details: microkeratome and/or trephine preparation of the donor in both penetrating and anterior and posterior lamellar techniques trephination, and techniques of suturing.

Other surgical manoeuvres commonly performed during keratoplasty such as cataract surgery, iris reconstruction, IOL extraction or anterior vitrectomy will also be reviewed. At the end of the Course, an overview of the most advanced but not yet regular techniques will also be reviewed. The main characteristic of this last part is to be updated every year because techniques and technology are constantly improving (for example: culture of endothelial cells or the use of Femtosecond lasers).

Aim(s) of the course (max. 10 lines) _____

To update the specifically interested in the latest advances on lamellar and penetrating techniques as well as related surgical manoeuvres in a comprehensive manner

Achievements (what will the participant achieve in knowledge) _____
