- Technical questions (IT)

NOT ALLOWED

- Phones
- Headphones, headsets
- Smartwatches
- Earphones, airpods
- Books, dictionaries, Google Translate
- Questions about exam content

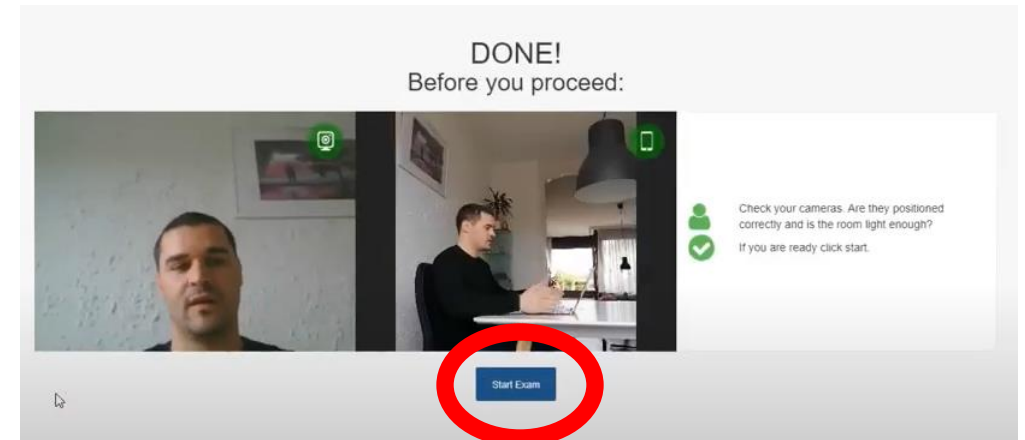

MCQ exam

- 10:00/10.30 CEST/09.00/09.30 BST
- 60 questions covering the complete program: basic science, medical or surgical topics
- 30 Multiple T/F Questions | 30 Single Best Answer Questions
- **NO** negative marking
 - Correct = 1 point
 - Incorrect = 0
- <Average score – 1 Standard Deviation> = 6 (Pass mark)
 - Score will be rescaled from 1 – 10
 - Must achieve 6 or higher in MCQ to pass exam
- 40% of overall score

Invigilation by remote proctor (ProctorExam)

MCQ exam

- Connect via link from ProctorExam in Google Chrome (**Check it is the correct link for PART I**)
- Meet the proctor (via chatbox) and do 3 checks:
 - System
 - ID
 - Roomscan

- You will be automatically logged into the Speedwell eSystem from there
- Exam opens in new tab –keep ProctorExam Tab open

30 Multiple True / False Questions (This is an example)

Questions 1 to 5 of 60 Time Remaining: 00:28:32

EBO Test Exam

Options:

- A. TRUE
- B. FALSE

A 5-year old boy, tall for his age with long thin fingers and hyperextensible finger joints, presents with bilaterally subluxated lenses, one down and in and the other up and out. Both parents are normal and there is no family history:

1. The most likely diagnosis is Weill-Marchesani syndrome
2. An electroretinogram is indicated
3. Visual acuity is best helped by aphakic or phakic spectacle correction based on retinoscopy and subjective refinement
4. In the differential diagnosis an autosomal recessive disease such as homocystinuria should not be considered
5. An echocardiogram should be performed

30 SBA questions (This is an example)

A 3 year old girl has been referred to the paediatric ophthalmology clinic because of unusual eye movements. The eye movements were noticed by the kindergarden staff. Parents were not aware of any problem. The child is fit and well and there is no family history of eye problems. Visual acuity is 0.9 (9/10 decimals, 0.100 LogMAR) in each eye. Anterior and posterior segment examination is normal. On examination, there is horizontal nystagmus in all positions of gaze. The frequency and amplitude of nystagmus increases significantly when the child fixes on a distance target. Eye-tracker testing shows this waveform pattern:

What is the most likely diagnosis?

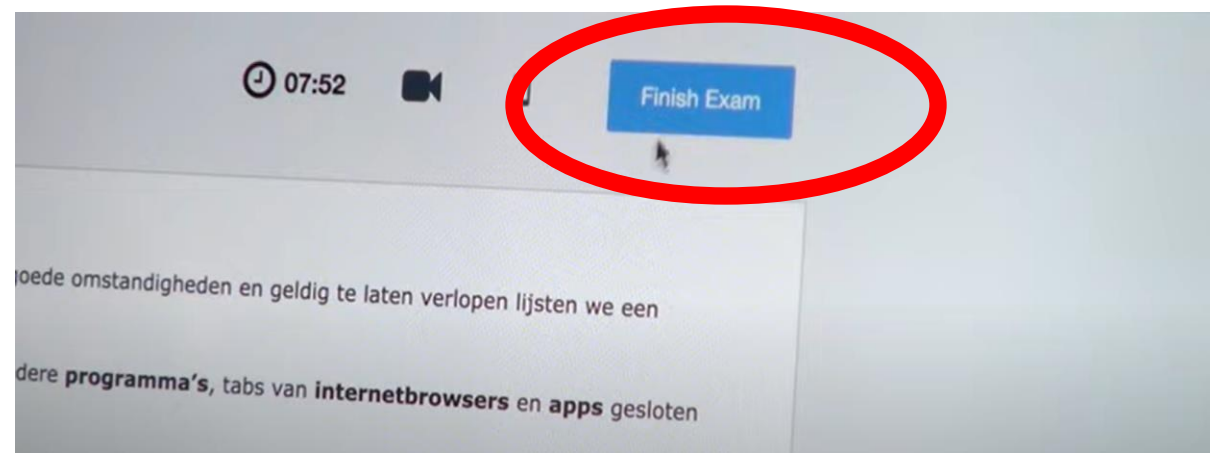

- ☐ Vestibular nystagmus
- ☐ Pendular nystagmus
- ☐ Manifest latent nystagmus
- ☐ Congenital idiopathic nystagmus

59	May require penetrating keratoplasty	TRUE	Review
60	Starts in early childhood	FALSE	Review

If you are happy with your answers, press the Finished button to complete the exam. You will not be able to change your answers after this.

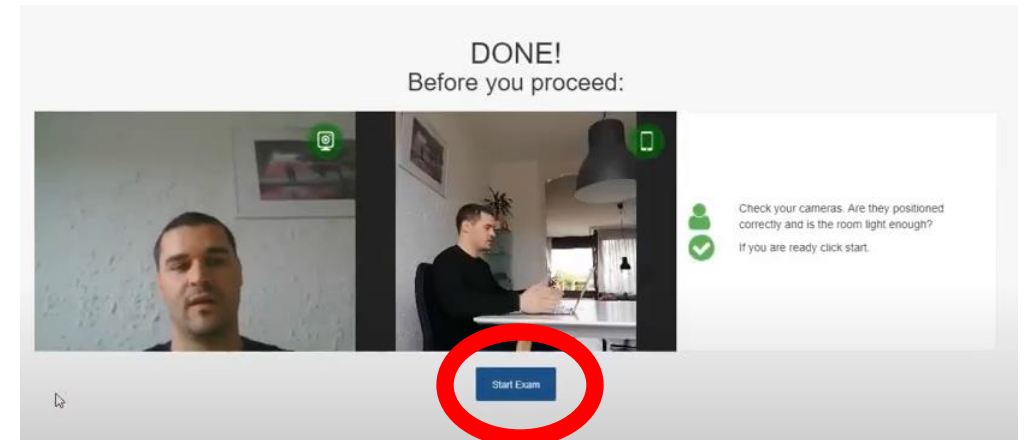

Close this tab, go back to ProctorExam tab and click “Finish Exam”

When you
complete
the MCQ
section...

Clinical Cases exam

- Connect via link from ProctorExam in Google Chrome (**Check it is the correct link for PART II**)
- Repeat process from earlier (MCQ Exam)
- Meet the proctor (via chatbox) and do 3 checks:
 - System
 - ID
 - Roomscan

- You will be automatically logged into the Speedwell eSystem from there
- Exam opens in new tab –keep ProctorExam Tab open

Clinical Cases

- 14:00/14.30 CEST/ 13.00/13.30 BST
- 8 cases in 80 minutes
- Around 5 questions per case
- English language
- Standardized cases, questions and answers
- 60% overall score
- Score will be rescaled similar to MCQ Score

A1- Optics, Refraction, Neuro	A2- Pediatrics, Strabismus
B1- Cornea, External	B2- Orbit, Adnexa
C1- Glaucoma	C2- Cataract, Refractive
D1- Retina	D2- Uveitis

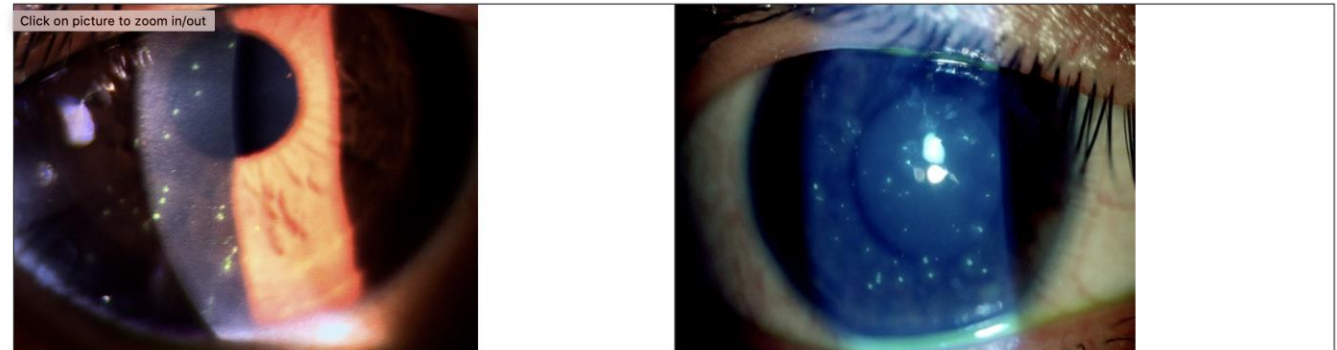

Clinical Cases

Question 1 of 29

Patient History:

- 27 year-old man
- Photophobia and foreign body sensation in both eyes for 2 days
- Vision has decreased "a bit"

For this case, over the next few screens you will be asked to identify important features, your diagnosis and treatment options.

Identify one of the key features you see here (you will be asked to identify two more on the next two screens).

EXAMPLES of the questions you will be asked

- Describe what you see in the image
- What disease would you suspect?
- What is the most important diagnostic test?
- What is the diagnosis?
- What is the treatment?

Scoring & Standard Setting

Outcome is a combination of:

- 40% MCQ (rescaled from 1 – 10)
- 60% Viva Voce (rescaled from 1 – 10)

Notes:

- **6 or higher is the pass mark** for each section
- You must achieve a **6 or higher in MCQ** to pass
- You must achieve a **6 or higher overall** to pass
- You may achieve **one** score less than 6 in viva voce, if your overall score is higher than 6

Results released in 4 weeks (estimate)
